

RAJAN KUMAR

Python Full Stack Developer

☎ +91-6202422559 ✉ rajansukul19@gmail.com [in LinkedIn](#) [o GitHub](#)

Summary

Python Full Stack Developer skilled in FastAPI, REST APIs, React.js, and MySQL with experience in building scalable web applications. Proficient in backend development, CRUD operations, API integration, JWT authentication, debugging, and deployment using Vercel and Render. Passionate about developing clean, production-ready, and user-focused applications.

Skills

Backend: FastAPI, RESTful APIs, API Development

Database: MySQL, MongoDB, SQL, CRUD Operations

Web: HTML, CSS, JavaScript, JSON, HTTP

Tools: Git, GitHub, Deployment

Experience

AI Content Curator Intern

Apr 2025 – Oct 2025

Nextleap.ai (Remote)

Python, NLP, LLMs, OCR

- Engineered AI pipelines to process 500+ PDFs, images, and handwritten notes into structured data using Python, OCR, and NLP.
- Automated large-scale question generation using LLMs, reducing manual effort by 60% and improving content generation speed.
- Implemented API-based workflows (n8n, Cloudinary, Google Drive) to streamline data processing, improving efficiency by 40% and ensuring system reliability.

Projects

Intelligent Breast Cancer Diagnostic Platform | *Python, Machine Learning, Deep Learning* Aug 2024 – Mar 2025

- Engineered a multi-modal diagnostic system combining clinical and imaging data to improve breast cancer detection accuracy.
- Built a breast cancer diagnostic system using ML/DL models with up to 92% accuracy.
- Processed and optimized medical datasets using feature scaling and dimensionality reduction techniques.

NextCart E-Commerce Platform | *React.js, FastAPI, JWT, Razorpay, MySQL* | Live Demo Apr 2026 – May 2026

- Built and deployed a full-stack e-commerce platform using React.js and FastAPI with JWT authentication.
- Implemented cart management, REST APIs, MySQL integration, and Razorpay payment gateway.
- Deployed frontend on Vercel and backend on Render with responsive UI and scalable backend architecture.

Student Management System | *React.js, FastAPI, JWT, SQLAlchemy, Vercel, Render* | Live Demo Apr 2026

- Built and deployed a full-stack Student Management System with JWT authentication and protected routes.
- Developed responsive dashboard for add, search, and delete student records using React.js and FastAPI APIs.
- Integrated SQLAlchemy database models and deployed frontend on Vercel and backend on Render.

Certifications

- IBM Full Stack Software Developer, Coursera (2025) — SQL, backend, data processing, dashboards.
- Healthcare IT Support & Health Informatics (2024) — EHR, healthcare data standards, clinical workflows.

Education

B.Tech Computer Science and Design

Graduated: 2026

Faculty of Engineering and technology (DMIHER), Wardha

CGPA: 7.36 / 10
